Subject: Nyanza Cleanup Public Comment

Hi Lisa,

I am an Ashland resident of 20 years. I have two questions/concerns about the current and future contamination risk:

1. Possible construction by Eversource workers for their proposed 5-year gas pipeline project. Will their digging expose dangerous chemicals, or other health concerns for nearby residents?
2. As part of the Ashland Upper Charles Trail initiative, Ashland is planning to create a multi-use path along the so-called "Trolley Brook Trail", which is an existing path beside "Chemical Pond", the Nyanza Cap, and ending on the MBTA access road.

Is building a multi-use, likely paved, trail in this location safe for humans?

Thank you.
Philip Bosinoff

Vice President of the Friends of the Ashland Upper Charles Trail (FAUCT)
